

MAX LOCK LOCKER™

Our new MAX Lock Locker™ is an automatic FULL locker, giving both 4 Wheel Drives AND 2 Wheel Drives optimized traction all the time—even in the most unforgiving conditions. With enhanced transfer of power to the wheels, rapid reaction to changing road conditions, and an elimination of wheel-spin, MAX Lock means confidence.

Important Note:

Auburn Gear has attempted to make this Application Guide as accurate as possible. However, Auburn Gear cannot guarantee complete accuracy. Identical model vehicles may have different axles or differentials than stated in this guide depending on original options ordered and other factors. It is advisable to check the vehicle to determine precisely which differential and axle are present. If you have any questions, please contact Auburn Gear's Customer Service Department at (260)-925-3200.

Important Note Regarding Front Axle Applications:

Auburn Gear's MAX Lock Locker works well on the front of 4-wheel drive vehicles provided that end users follow these important guidelines. The MAX Lock Locker should be used only on vehicles equipped with locking hubs on the front axle or with front axle disconnect. In addition, the vehicle must not be equipped with full time 4-wheel drive. Vehicles equipped with a MAX Lock Locker on the front axle should not be operated on the highway with the front hubs locked and 4-wheel drive engaged. Following these guidelines will ensure on-road drivability while still providing maximum off-road traction.
